### REASONS FOR ALLOWANCE

1. Claims 1-21, 23-33 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 10 recite, inter alia, *the core arms and core elements are serially linked to form a single, un-branched, closed flux path, whereby all of the primary and secondary windings are linked by the same flux.*

Claim 13 recites, inter alia, *the magnetic core elements and core segments forming an un-branched, closed magnetic flux path extending across the first and second faces and through the layers of the board.*

Claim 14 recites, inter alia, *locating magnetic core elements in flux-conducting relation between the core arms on opposite faces of the printed circuit board to form a transformer core that has a single, un-branched, closed flux path incorporating each of the core arms and core elements.*

Claim 31 recites, inter alia, *at least a plurality in excess of two magnetic elements exterior of the circuit board, each magnetic element being mounted on or over at one of the faces, and extending generally parallel to the faces of the board in flux conducting relation from one of the segments to another of the segments to form a single, closed, un-branched flux path.*

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh T. Mai whose telephone number is 571-272-1995. The examiner can normally be reached on 5/4/9 Schedule.
